

eLearnit 2020 Virtual Conference

Navigating Through COVID-19 to Ensure Quality Learning

9-11 June 2020

Name of Speaker: Ms. Kaye Leah Cacho-Sitchon

Date and Time of Presentation: 10th June 2020

Title of Presentation: Flipping the Classroom with EdTech Tools

Questions:

1. How do we manage activities with very large groups of students...

In managing large groups of students, capitalize on teamwork and collaboration. The EdTech Tools we introduced would definitely help teachers accomplish this and at the same time monitor the progress of the class as they work on the given activities in smaller groups. One thing that has worked for me is to assign a team leader and coordinate with them regularly.

Here are other tools we can use for collaboration and peer learning:

2. Please how you think the vocational or practical can be covered in this situation?

This is a very good question. Vocational and practical tasks can be difficult for remote learning, but, I would say that there is a tool that we can use that will allow students to perform tasks that would hit the learning goals. The simplest tools we have available is video recording especially for skill demonstrations. As teachers, we can deliver videos ourselves for our students to watch, or send links to videos available online. Other tools that fellow educators recommend are available in the presentation I gave as well as this helpful link:
